St. Benedict Catholic School
Digital Learning Environment
(1:1 iPad Initiative)

The focus of the Digital Learning Environment (DLE) initiative at St. Benedict Catholic School is to provide tools and resources to the 21st Century Learner. Educate, Engage, and Empower for Excellence has been our mantra to nurture our students. Excellence in education requires that technology is seamlessly integrated throughout the educational program. Increasing access to technology is essential for that future, and one of the learning tools of these twenty-first century students is the iPad. The individual use of iPads is a way to empower students to maximize their full potential and to prepare them for college and the workplace.

Learning results from the continuous dynamic interaction among students, educators, parents and the extended community. Technology immersion does not diminish the vital role of the teacher. To the contrary, it transforms the teacher from a director of learning to a facilitator of learning. Effective teaching and learning with iPads integrates technology into the curriculum anytime, anyplace. The policies, procedures and information within this document apply to all iPads and Laptops (referred collectively as computers throughout this handbook), as well as any other device considered by the Administration to come under this policy used at St. Benedict School.

Teachers may set additional requirements for use in their classroom.

1. RECEIVING YOUR iPad & iPad CHECK-IN

1.1 Receiving Your iPad

iPads will be distributed each fall during “*iPad Bootcamp*.” **Parents & students must sign and return Student Pledge documents and Acceptable Use Policy before the iPad can be issued to their child.**

1.2 iPad Check-in

iPads will be returned during final week of school so they can be checked for serviceability. If a student transfers out of St. Benedict School during the school year, the iPad will be returned at that time.

1.3 Check-in Fines

Individual school iPads and accessories must be returned to the St. Benedict School Computer Lab at the end of each school year.

Students who withdraw, are suspended or expelled, or terminate enrollment at St. Benedict School for any other reason must return their individual school iPad on the date of termination. If a student fails to return the iPad at the end of the school year or upon termination of enrollment at St. Benedict School, that student will be subject to criminal prosecution or civil liability. The student will also pay the replacement cost of the iPad, or, if applicable, any insurance deductible. Failure to return the iPad will result in a theft report being filed with the Decorah Police Department. Furthermore, the student will be responsible for any damage to the iPad, consistent with the District's iPad Protection Plan and must return the computer and accessories to St. Benedict School Computer Lab in satisfactory condition. The student will be charged a fee for any needed repairs, not to exceed the replacement cost of the iPad.

If students leave their iPad at home, they are responsible for getting the course work completed as if they had their iPad present. Violations will be documented by teachers. Multiple violations could result in temporary suspension of privileges and student may be required to leave iPad at school. A “check out” and “check in” procedure will be put in place for up to 14 days. Consequences will be determined by classroom teacher(s), technology staff and administration.

Students may also use provided apps for cloud storage (ie DropBox). Storage space will be available on the iPad—BUT it will NOT be backed up in case of re- imaging. It is the student's responsibility to ensure that work is not lost due to mechanical failure or accidental deletion. iPad malfunctions are not an acceptable excuse for not submitting work. Students will receive instruction at school concerning backing up of files.

Periodic checks of iPads will be made to ensure that students have not removed required apps.

6.8 Acceptable Use Policy

St Benedict Catholic School Student Computer/Internet Usage Acceptable Use Policy

All of the School's automated systems, including electronic mail, Internet access and electronic storage systems, are School property, and are not confidential. The School has the right to access, review, copy, modify, and delete any information transmitted through or stored in the system, including email messages, web postings, and other online communications. Files containing personal information of a student are treated no differently than School's other files, and the student has no expectation of privacy in such materials.

Internet access is available to students at St. Benedict Catholic School. The Internet is an electronic highway connecting millions of computers and individual subscribers all over the world. With access to computers and people all over the world also comes the availability of material that may not be considered to be of educational value in the context of the school setting. On a global network it is impossible to control all materials and a user may discover controversial information. The school believes that the valuable information and interaction available on the Internet far outweighs the possibility that users may procure material that is not consistent with the educational objectives of the School.

Internet access is coordinated through a complex association of government agencies and regional and state networks. The smooth operation of the network relies upon the proper conduct of the end user who must adhere to strict guidelines. These guidelines are provided so that the students are aware of responsibilities they must undertake when accessing the School's network resources. In general, students are required to make efficient, ethical and legal utilization of the network resources. If a School user violates any of these provisions, his or her account may be terminated and further discipline may be imposed.

- 1) **Acceptable Use.** The purpose of St. Benedict Catholic School's Internet access is to support research and education consistent with School goals and objectives by providing access to unique resources and opportunity for collaborative work. The use of a student account must be in support of education and research and consistent with the educational objectives of the School. Use of other organizations' networks for computing resources must comply with the rules appropriate for that network; however students remain subject to the School's general rules governing legal and ethical behavior when using such resources on School property or at School activities. The creation, access, or transmission of any material in violation of any federal or state law, regulation or School policy is prohibited. This includes, but is not limited to: material protected by copyright, trademark or other trade secret laws, and items which are or may be reasonably considered to be defamatory, obscene, pornographic, lewd, profane, offensive, discriminatory, harassing, or otherwise disturbing or harmful to minors. Use of network resources for commercial activities, product advertisement, political lobbying and/or other activities in violation of federal or state ethics and campaign disclosure laws is also prohibited. Only properly licensed software authorized by the School may be loaded onto the School's system, and no programs or files shall be downloaded from the Internet without prior permission of the School.
- 2) **Privilege.** The use of the Internet and network resources is a privilege, not a right, and inappropriate use may result in the suspension or cancellation of those privileges or other disciplinary action. The principal will deem what is inappropriate use in accordance with these guidelines and will take appropriate action. The principal or a system administrator may suspend or close an account at any time. Notification of any suspension or cancellation of an account will be given in writing to the user within two weeks of the action. Students whose accounts are denied, suspended, or revoked may appeal such action.
- 3) **Network Etiquette (Netiquette).** Users are expected to abide by the generally accepted rules of network etiquette. These include, but are not limited to, the following:
 - a) **Be polite.** Do not use abusive or offensive language in messages sent to others.
 - b) **Use Appropriate Language.** Do not swear, use vulgarities, profanity, lewd remarks, or any other inappropriate language. Illegal activities are strictly forbidden.

- c) **Do not release personal information.** Do not reveal personal addresses or phone numbers or other personal information, or that of other students or colleagues.
 - d) **Note that email, web postings (including blogs, Facebook/Myspace pages, etc.), and other online communications are not private.** People who operate the system and other school personnel do have access to all information transmitted through or stored in the School system. Messages relating to or in support of illegal activities or activities in violation of School policies may be reported to the proper authorities or used against students in school disciplinary proceedings.
 - e) **Respect other users.** Do not use the School's network in such a way that would disrupt the use of the network by other users, or would waste system resources. Do not send unsolicited e-mail messages (including spam) and do not use the School's network as a way to harass, bully or intimidate others. Such behavior will not be tolerated and will be subject to disciplinary action.
 - f) **Compliance with Laws.** Under no circumstances may any user engage in any activity that is illegal under local, state, federal, or international laws, or that is prohibited by School policies or rules.
- 4) **Reliability.** Catholic school makes no warranties of any kind, whether expressed or implied, for the service it is providing. The School will not be responsible for any damages that students or other persons may suffer. Damages due to loss of data resulting from delays, non deliveries, miss-deliveries, or service interruptions, whether caused by the School's own negligence or students' errors or omissions. The School specifically denies any responsibility for the accuracy or quality of information obtained through its services.
- 5) **Security.** Security on any computer system is a high priority, especially when the system involves many users. If students identify a security problem with the School's Internet or network resources, student must notify a teacher, principal or system administrator. Students should not demonstrate the problem to other users. In addition, students should take all necessary steps to prevent unauthorized access to their accounts, and may not use another individual's account. An attempt to log on to the Internet as a system administrator is prohibited. Any user identified as a security risk or having a history of problems with other computer systems may be denied access to the School's Internet and network resources.
- 6) **Vandalism.** Vandalism by a student will result in cancellation of a student's network privileges and may be grounds for other disciplinary action. Vandalism is defined as any malicious act or attempt to harm, modify, or destroy the computer property or data of the School or another user, the Internet or network resources of the School, or any other technologies used in the School.

- 7) **Restricted Material.** Users shall not create, access, download, or disseminate any text file, picture, or other material that includes material which is defamatory, harassing, discriminatory, obscene, pornographic, libelous, indecent, vulgar, profane, lewd, disturbing and harmful to minors, or which advertises any product or service not permitted to minors by law, or which is otherwise prohibited by this policy. If a user encounters such restricted material, user should immediately terminate contact with the material and notify School personnel.
- 8) **Unauthorized Costs.** Users shall not access any service or site via the Internet which has a cost involved without prior consent of the School. Users accessing such a service without prior consent will have access suspended and will be responsible for all costs.
- 9) **Account Information.** The School will require all users to notify the system administrator of all change in account information. Currently, there are no user fees for use of the Internet.
- 10) **Monitoring.** The School may monitor the use of School equipment, systems, and network resources at any time, with or without notice to users.
- 11) **Harassment and Bullying.** In accordance with Iowa law, the School policy against harassment and bullying applies to electronic communications such as e-mail messages, Internet-based communications, cell phones, and electronic text messaging while on School property, at School activities or School sponsored events. Students shall not engage in harassing or bullying behavior via any electronic means, including those means that may not necessarily be a part of the School communications network system.
- 12) **Internet Safety.** To the extent required by federal law, the School shall monitor the online activities of minor students and use technology protection measures to protect against their access of inappropriate material online. The School shall also educate students about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyberbullying awareness and response. The School education does not and should not take the place of parents educating their children at home about the importance of Internet and other online safety measures.
- 13) **Student Use of Personal Communication Devices.** The School prohibits student use of personal communication devices such as cellular phones, smart devices, palm pilots, and PDAs for purposes not directly related to established educational programming. The prohibition applies during the school day and while participating in school activities, whether those activities are in the school or elsewhere. If a student has a question regarding the use of a communication device, including but not limited to whether the use of that device is prohibited by this policy, the student should contact the Principal before using the device. The prohibition of these devices is required to prevent unnecessary disruption of the educational process.

- 14) **Authorization.** Parent/Guardians shall be asked, as part of registration, to sign off as having read St Benedict School's DLE Handbook with their child.
